Project Design Phase-I
Solution Architecture

Date	14 February 2026
Team ID	LTVIP2026TMIDS36692
Project Name	Project – Strategic Product placement Analysis: Unveiling Sales Impact with Tableau Visualization
Maximum Marks	4 Marks

Solution Architecture:

The " Strategic Product placement Analysis: Unveiling Sales Impact with Tableau Visualization" workbook is designed to be cloud-enabled (Tableau Server/Tableau Online), ensuring seamless accessibility and collaboration across teams. The solution is built to scale from a single sales region to a multi-country enterprise environment by simply integrating additional data sources and connectors. This flexible architecture allows organizations to expand analytics capabilities, monitor real-time sales performance, and support data-driven decision-making at every level of the business.

Example - Solution Architecture Diagram:

Guided Project

Strategic Product Placement Analysis

Unvelling Sales Impact with Tableau Visualization

Architecture Overview

Data Collection And Extraction Of Data

Collecting sales data from Excel sheets or databases.

Data Preparation

Cleaning, formatting, and organizing the data.

Data Visualization

Visualizing data using Tableau charts (Bar, Pie, Line).

Dashboard

Building dynamic dashboards with Tableau.

Story

Creating a coherent narrative with Tableau Story.

Performance Testing

Testing dashboards for accuracy and performance.

Web Integration

Integrating dashboards into a web application.

Project Demonstration & Documentation

Presenting the project results and creating documentation.
